Portfolio Management Strategy

- Using a discretionary approach, trades are entered manually with automatic intervention when a combination of historically proven set of technical indicators is met.
- The goal of this strategy is to enter both moderate and aggressive trades with the aim of providing investor with monthly profit of between 5% – 30% on both strategies.
- A minimum of three different technical indicators are used in most cases to determine market entry levels.
- Strict Money Management rules are used while Stealth Stop-Loss and Limits are automatically set and adjusted during trading using ATR and other indicator settings.

Portfolio Management Strategy – Faida Global Moderate

- Trade with Professionals – The Faida Global Moderate PAMM Account is an account where monies of different investors are pooled together but remain segregated in the name of the specific account holder.
- The greatest advantages of The Faida Moderate Account is the extremely LOW capital requirement (minimum USD\$ 100) and the low performance fees of 30%.
- You can deposit and withdraw your funds with no penalty at any time as you are in full control of your account.
- In comparison to the Faida Global Aggressive account, this strategy averages 50% less account drawdown but also lower profits. It is the preferred choice for conservative traders.
